EARTH & AGGREGATE SOLUTIONS

## MATERIALS

### Primary Aggregate

A full range of products and services is available on demand, including inert waste disposal.

- Materials are supplied to UK and European specifications
- Specific customer specifications can be supplied on request
- Materials are supplied from one of our strategically located sources

### Clay

Clays are available in large quantities, including:

- 10<sup>-9</sup> used for capping and lining solutions
- 2A and 2B, ideal for use as a general bulk fill.

### Re-cycled Aggregate and Sand

Recycled from our new washing plant, fully washed 40,20,14 & 10mm aggregates and concrete sand.

### Soil

JPE supply low grade soil making material through to the highest quality top soil.

All soils are screened to provide the correct grade of soil required.

## SERVICES

### Inert Waste Disposal

JPE operate LFT exempt disposal facilities for inert wastes supported by appropriate WAC test. Our Shire Oak landfill in Brownhills is within easy reach of much of the West Midlands.

### Bulk Material and Waste Haulage

JPE operates a modern, well maintained, fleet of over 25 vehicles fitted with the latest safety and operating features, e.g. weigh loaders; cab tipping automation; colour reversing cameras and Navman tracking. There is an option of lightweight or hardox steel bodies and all vehicles meet the latest environmental standards on emissions.
