

Test Statement

Our typical approach to testing of materials is set out in the table below which is contained within our FPC manual. This is however only a minor part of the overall quality programme that is applied to our products and other testing requirements can be included to meet specific Client requirements.

Minimum Test Frequencies

Property description	BSEN Test Method	Minimum Test Frequency
General Description	-	Each incoming load by visual inspection
Aggregate composition including organics	Visual sorting of the +10mm fraction*	1 per week of production or each 5,000 T
Grading	933-1	1 per week of production or each 5,000 T
